

## SES-MKP-X3TEST

### DESCRIPTION:

Sescom's MKP-X3TEST is a 3-Pin XLR cable field testing unit designed for quick "on-the-fly" testing to determine whether an XLR cable has continuity. If both LEDs illuminate when a cable is connected to the SES-MKP-X3TEST, this indicates that the cable has continuity. This pocket-sized rugged tester is capable of 100 hours of continuous use, making it a perfect tool for any gig bag. After testing the cable, it is recommended that the unit be disconnected; this will help preserve the internal battery life.

**\*\*Batteries are non-replaceable\*\***

### FEATURES:

- High-Quality 3-Pin Neutrik XLR Connectors
- Up to 100 hours of continuous use
- 2 Indicator LEDs- If both lights are illuminated, there is continuity
- Portable, compact XLR Field Tester
- Rugged Aluminum Enclosure

# SES-MKP-X3TEST

## SPECIFICATIONS:

- **Dimensions:** 3.50 x 1.25 x 1.00" (88.90 x 31.75 x 25.40 mm)
- **Connection Type:** XLR
- **Insertion Force:**  $\leq 20$  N
- **Withdrawal Force:**  $\leq 20$  N
- **Lifetime:** > 1000 mating cycles
- **Locking Device:** Latch lock
- **Contact Plating:** 2  $\mu$ m Ag over 2  $\mu$ m Ni
- **Contact Material:**
  - **Female:** Bronze (CuSn8)
  - **Male:** Brass (CuZn35Pb2)
- **Locking Element:** Steel Ck67
